

North Warwickshire Neighbourhood Watch

You could help make our area a safer place by

Joining **Neighbourhood Watch** By protecting your

valuables with **SMARTWATER**

By helping to make your community a better
and safer place for you and your children

- Yes you can make a difference!

Neighbourhood Watch is as simple as it sounds - looking after yourself and those
closest to you - your Neighbours.

Remember you are in the best place to be able to spot anything suspicious in your
street and alert your neighbour or the authorities in a bid to prevent crime.

You can also protect your own property and valuables with SMARTWATER, a
normally invisible liquid developed by forensic science to leave an indelible trace
or DNA on your valuables so that they can be traced directly to you if they are stolen.

Vulnerable people in your household or neighbourhood? You can significantly
decrease the likelihood of burglary and theft by fitting security measures to doors and
windows or even simply putting an adequate lock on the Garden Shed. (most break-ins
are carried out by using the property holders own garden tools)
